Skills

I'm a communication designer and front-end developer.

During my education and professional experience I achieved a wide knowledge of the most relevant software used in the field, especially the ones related to interfaces and web design. Furthermore, I learned the most common programming languages for the web in order to realize sites and platform prototypes, even with the use of data visualization.

In my leisure time I love to go hiking, but when I'm not in the mountains I delight in creating interactive installations for events, combining photography and electronics and in listening to, and playing, music.

Academic Experience

Novela: Festival des Savoirs / Prix de la cartographie des controverses

October 13th, 2014, Toulouse (France)

Presentation of "50.000.001, an Environmental Odyssey", the final project realized for Density Design Final Synthesis Studio held at Politecnico di Milano in A. Y. 2013. "Prix de la cartographie des controverses", part of the Novela Festival, has been an event oriented to the public presentation of methods and tools to locate in the major issues of our time. Led by Bruno Latour and Dominique Boullier.

ENSSIB Lyon / UmiX Hackathon

September 25th > 27th, 2014 - Lyon (France)

UmiX invited group of students to rethink the Information Architecture of Libraries. During the 48 hours of the event participants were asked to envision and prototype innovative services, considering both the digital and physical spaces of libraries. My team won the hackathon.

University of Amsterdam / Digital Methods Summer School 2014

June 23rd > July 4th, 2014, Amsterdam (Netherlands)

Remote event analysis: mapping conflicts, disasters, elections and other events with online and social media data, especially Twitter.

University of Amsterdam / 2nd EMAPS Data Sprint

24th > March 28th, 2014, Amsterdam (Netherlands)

Coping with Vulnerability to Climate Change: Adaptation, its Limits and Post-Adaptation Mechanisms. A data analysis research concerning european projects on adaptation to climate change and their financial subsidy.

University of Lapland / Erasmus Program at Lapin Yliopisto

January > June, 2014, Rovaniemi (Finland)

I attended classes in Audiovisual Media Culture field of studies, held in english.

Education

Politecnico di Milano / Master Degree

October 2012 > July 2015, Milan (Italy)

Communication Design

Politecnico di Milano / Bachelor Degree

October 2009 > July 2012, Milan (Italy)

Communication Design

Liceo scientifico Galileo Galilei / High school diploma

September 2004 > July 2009, Milan (Italy)

High school leaving qualification in scientific studies

Other Experiences

Google Italia / Converge Hackathon

7th March, 2015, Milan (Italy)

Event organized by Google Italy and Frog Milan. The brief has been the following: "come up with new innovative concepts related to the immersive media and the new technologies".

My team won the prize for the best Design Execution.

Corriere della Sera / Alcide De Gasperi e le parole del consenso

7th August, 2014

"One page" website which collects various data visualizations related to Alcide De Gasperi's political speeches. The project came as digital attachment to the cultural section of the newspaper (issue of August 7th, 2014).

Relevant work experiences

WEWORK Fablab / Laboratory Technician

September 2015 > Ongoing, Cantù (Italy)

Design and development of products related to the field of digital fabrication, through the use of 3D printers, laser cutters, plotters and electronic boards (such as Arduino and Little Bits). Beyond this main activity, I'm planning courses for students of high school and younger.

Density Design Research Lab / Intern

March 2014 > June 2014, Milan (Italy)

Research and commercial projects, following the attitude of the Lab and the academic environment. General communication.
